Subject: Phase I Environmental Site Assessment
150 Eureka Street
San Francisco, California

Dear David:

Enclosed is the Phase I Environmental Site Assessment Report for 150 Eureka Street located in San Francisco, California.

Please do not hesitate to contact Derek Wong or myself at (510) 652-3222 if you have any questions.

Sincerely,

Peng Leong
Principal Engineer

... (510) 652-3222 ...

EXECUTIVE SUMMARY

Innovative and Creative Environmental Solutions (ICES) was retained by 150 Eureka Street, LLC to conduct a Phase I Environmental Site Assessment (ESA), in general conformance with the scope and limitations of the American Society for Testing Materials Standard Practice E1527-13 for 150 Eureka Street located in San Francisco, California (the "Site"). Any exceptions to, or deletions from, this practice are described in Section 1.3 of this report.

PROPERTY DESCRIPTION

The Site is located on the west side of Eureka Street, between 18th and 19th Streets, and is within the legal jurisdiction of the City and County of San Francisco and the State of California. The Site is identified by the San Francisco County Assessor's Office as Block 2692 Lot 007.

The Site consists of one parcel covering an area of approximately 6,250 square feet. A vacant 2-story church currently occupies the entire Site.

FINDINGS

The Site was used for residential applications from 1886 through 1950. A church was built at the eastern portion of the Site in 1914 and enlarged to cover the entire Site by 1950. The church structure is currently vacant at this time.

A review of regulatory records for the Site indicated that there were no violations at the Site. Additionally, no environmental liens or "activity or use limitations" were found for the Site.

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-13 as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

ICES identified no on-site RECs during the course of this assessment.

Controlled Recognized Environmental Conditions (CRECs) are defined by the ASTM Standard Practice E1527-13 as a past release of

hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

No on-site CRECs were identified by ICES during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls.

ICES did not identify any onsite HRECs during the course of this assessment.

Environmental Issues include environmental concerns identified by ICES that warrant discussion, but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-13.

Due to the age of the existing structure at the Site, it is possible that ACMs and lead-based paint were utilized in the construction of the existing structure. During demolition, renovation, or any activity that may disturb the building materials, the materials should be inspected by a licensed professional for the potential presence of ACMs and lead.

CONCLUSIONS

ICES has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by ASTM E1527-13 for 150 Eureka Street located in San Francisco, California. Any exceptions to, or deletions from the Scope of Work are described in this report where applicable. This assessment has revealed no evidence of adverse environmental conditions associated with the Site. ICES recommends no further investigations for the Site at this time.

The evaluation is site specific, based on the information available at this time and could be revised if new information necessitating further review of the Site and adjacent facilities becomes available.

1.0 INTRODUCTION

This report documents the methods and findings of the Phase I Environmental Site Assessment (ESA) performed in conformance with the scope and limitations of the American Society for Testing Materials (ASTM) Standard Practice E1527-13 for 150 Eureka Street located in the City and County of San Francisco, California (the "Site"; Figure 1).

1.1 Involved Parties

Innovative and Creative Environmental Solutions (ICES) was retained by 150 Eureka Street, LLC to evaluate the environmental conditions at the Site and surrounding area.

1.2 Scope of Work

The purpose of the Phase I ESA was to:

1. Assess the potential sources of hazardous substances at the Site as a result of on-site or off-site activities that may have affected site soil, groundwater, or soil vapor quality; and
2. Evaluate the presence of chemically-affected soil on the Site to the extent indicated by visual observations, personal interviews, and regulatory records.

This Phase I ESA included the following tasks:

- Review of background information on site setting and history of site usage
- Field inspection of the Site and neighboring properties
- Review of regulatory records concerning the Site and surrounding area
- Data evaluation and report preparation

1.3 Limitations

Property conditions, as well as local, state, tribal and federal regulations can change significantly over time. Therefore, the recommendations and conclusions presented as a result of this study apply strictly to the environmental regulations and property conditions existing at the time the study was performed. Available information has been analyzed using currently accepted assessment

techniques and it is believed that the inferences made are reasonably representative of the Site. ICES makes no warrant, expressed or implied, except that the services have been performed in accordance with generally accepted environmental property assessment practices applicable at the time and location of the study.

Considerations identified by ASTM as beyond the scope of the Phase I ESA that may affect business environmental risk at a given property include the following: asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic resources, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, mold, vapor intrusion, and high voltage lines. These environmental issues or conditions may warrant assessment based on the type of property transaction; however, they are considered non-scope issues under ASTM Standard Practice E1527-13.

The purpose of this assessment is solely to satisfy one of the requirements for qualification of the innocent landowner defense, contiguous property owner or bona fide prospective purchaser under the Comprehensive Environmental Response, Compensation and Liability Act.

The Phase I ESA is not, and should not be construed as, a warranty or guarantee about the presence or absence of environmental contaminants that may affect the Site. Neither is the assessment intended to assure clear title to the property in question. The sole purpose of assessment into property title records is to ascertain a historical basis of prior land use. All findings, conclusions, and recommendations stated in this report are based upon facts, circumstances, and industry-accepted procedures for such services as they existed at the time this report was prepared (i.e., federal, state, and local laws, rules, regulations, market conditions, economic conditions, political climate, and other applicable matters). All findings, conclusions, and recommendations stated in this report are based on the data and information provided, and observations and conditions that existed on the data and time of the Site visit.

Responses received from local, state, or federal agencies or other secondary sources of information after the issuance of this report may change certain facts, findings, conclusions, or circumstances to the report. A change in any fact, circumstance, or industry-accepted procedure upon which this report was based may adversely

affect the findings, conclusions, and recommendations expressed in this report.

The assessment did not include collection or analysis of soil, groundwater, and/or soil vapor samples; testing of electrical equipment for the potential presence of polychlorinated biphenyls; assessment of natural hazards such as naturally occurring asbestos, radon gas, or methane gas; assessment of the potential presence of radionuclides; or assessment of nonchemical hazards, such as the potential for damage from earthquakes or floods or the presence of endangered species or wildlife habitats.

1.4 Limiting Conditions

ICES was granted full and complete access to the Site.

1.5 Data Gaps and Data Failure

According to ASTM E1527-13, data gaps occur when the Environmental Professional is unable to obtain information required, despite good faith efforts to gather such information.

Data failure is one type of data gap. According to ASTM E1527-13 "data failure occurs when all of the standard historical sources that are reasonably ascertainable and likely to be useful have been reviewed and yet the objectives have not been met". Pursuant to ASTM Standards, historical sources are required to document property use back to the property's first developed use or back to 1940, whichever is earlier.

No data gaps were identified during the course of this assessment.

1.6 Reliance

All reports, both verbal and written, are for the benefit of 150 Eureka Street, LLC. This report has no other purpose and may not be relied upon by any other person or entity without the written consent of ICES. Either verbally or in writing, third parties may come into possession of this report or all or part of the information generated as a result of this work. In the absence of a written agreement with ICES granting such rights, no third parties shall have rights or recourse or recovery whatsoever under any course or action against ICES, it's officers, employees, vendors, successors or assigns. Reliance is provided in accordance with ICES Proposal and Standard Terms & Conditions executed by 150

Eureka Street, LLC on October 24, 2016. The limitation of liability defined in the Terms and Conditions is the aggregate limit of ICES's liability to the client and all relying parties.

2.0 SITE AND VICINITY DESCRIPTION

2.1 Site Location

The Site is located on the west side of Eureka Street, between 18th and 19th Streets, and is within the legal jurisdiction of the City and County of San Francisco and the State of California. The Site is identified by the San Francisco County Assessor's Office as Block 2692 Lot 007.

2.2 Adjacent Properties

Land use in the vicinity of the Site is primarily residential. The Site is bounded on the east by Eureka Street. Residential structures occupy the areas north, south, east, and west of the Site.

2.3 Site Description and Current Site Uses/Operations

The Site consists of one parcel covering an area of approximately 6,250 square feet. A vacant 2-story church currently occupies the entire Site.

The Site is fueled by electricity provided by Pacific Gas & Electric. The Site and surrounding area are all served by the city municipal water supply.

3.0 ENVIRONMENTAL SETTING

3.1 Regional Physiographic Conditions

The U.S. Geological Survey North San Francisco Quadrangle indicated that the elevation at the Site is approximately 172 feet above mean sea level and that the topography at the Site slopes in an easterly direction.

3.2 Geologic Conditions

According to the information provided in the Environmental Data

Resources, Inc. ("EDR") database report dated October 25, 2016, the geology within the Site belong to the Urban Land Series which consists of clayey soils.

3.3 Hydrogeology

The inferred groundwater flow direction at the Site is to the east based on topography. Depth to groundwater is unknown at the Site. The nearest major body of water is the San Francisco Bay, which lies approximately 3.2 miles east of the Site.

4.0 RESULTS OF INVESTIGATION

4.1 Site Inspection Observations

A field reconnaissance of the Site was conducted by ICES on October 26, 2016. The objective of the reconnaissance was to check for visual evidence of past or present use or storage of hazardous materials that could potentially affect the soil, groundwater, and soil vapor quality at the Site. Site photographs are included in Appendix A.

Transformers

No transformers are located at the Site.

Storage Tanks and Drums

There were no apparent underground storage tanks or drums currently located at the Site.

Wells

There were no wells identified on the Site.

Septic Systems

No septic systems were observed on the Site.

Evidence of Releases

No spills, significant staining, or other indications that a surficial release has occurred at the Site were observed.

4.2 Adjacent Site and Vicinity Observations

No apparent signs of chemical releases were noted at any of the neighboring properties.

4.3 Results of Regulatory Agency List Review

A governmental records report for the Site and the surrounding areas was prepared by EDR dated October 25, 2016. The geographic database search was conducted following the ASTM standards for a government records review. A copy of the EDR report is included in Appendix B. The record search included sites on governmental environmental lists within a one-eighth to one mile radius of the Site to determine if the Site or nearby properties have been identified by Federal or State regulatory agencies and to identify hazardous material handling, storage or storage disposal operations. Within the EDR report, a complete listing of agency records is provided.

A total of ninety-four cases with possible releases of chemicals of concern to the environment were identified within the area of the search. EDR's radius map list review identified:

- one LUST case;
- two UST cases;
- one SWEEPS UST case;
- one CA FID UST case;
- one Historical Auto Station; and
- twenty Historical Cleaners;

within a one eighth-mile radius from the Site;

- two RCRA Large Quantity Generators;
- four RCRA Small Quantity Generators;
- one RCRA Conditionally Exempt Small Quantity Generator;
- three LUST cases;
- six UST cases;
- two HIST UST cases;
- one RCRA NonGen/NLR case;
- one DRYCLEANERS case; and
- one HIST CORTESE case;

within a one quarter-mile radius from the Site;

- one ENVIROSTOR case;
- thirty-three LUST cases; and

- ten HIST CORTESE cases;

within a one half-mile radius from the Site;

- one ENVIROSTOR case;
- one HWP case; and
- one Notify 65 case;

within a one mile radius from the Site.

Of the ninety-four cases, all ninety-four are not considered to have impacted the Site because of one of the following criteria:

1. No further action (NFA) status;
2. A De-listed status;
3. No violations; and
4. Their distance (approximately one-eight mile or greater) from the Site, and/or their relative location cross or down gradient from the Site.

A NFA status or a de-listed status for a site/case indicates that chemical releases to the environment had not occurred or had been successfully remediated. In addition, sites/cases with a "No Violations" notation have not had known releases of chemicals into the environment.

The local topography suggests that the groundwater gradient flows in an easterly direction. It is, therefore, unlikely that properties situated in the cross or down gradient locations of the Site could have impacted the Site through groundwater flow.

4.4 Site History

Historical records reviewed as part of this ESA included aerial photographs, Sanborn Fire Insurance maps, an environmental lien/AUL report, city directories, and an interview with the property owner. Regulatory records were also reviewed to evaluate whether the Site or other facilities located upgradient and adjacent to the Site are or have been subject to regulatory action by federal, state, or local environmental agencies.

Aerial Photographs

Historical aerial photographs of the Site and vicinity from 1939 through 2012 were provided by EDR (Appendix C). A historical account of the landuse of the Site between 1939 and 2012 based on a

review of available aerial photographs is presented below.

The Site

The 1938 aerial photograph showed the existing structure located at the Site. There were no significant changes to the neighboring area in the 1943, 1946, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2010, and 2012 aerial photographs relative to the 1938 aerial photograph.

Neighboring Area

The majority of the existing structures located north, south, east, and west of the Site were observed in the 1938 aerial photograph. There were no appreciable changes to the neighboring area in the 1943, 1946, 1956, 1963, 1968, 1974, 1982, 1993, 1998, 2005, 2009, 2010, and 2012 aerial photographs relative to the 1938 aerial photograph.

Sanborn Fire Insurance Maps

A Sanborn Map site search was conducted by EDR (Appendix D). The EDR search indicated that Sanborn Maps were available for the Site and the immediate surroundings.

A historical account of the land use of the Site between 1886 through 1999 based on the review of the available Sanborn Maps is presented below.

The Site

The 1886 Sanborn Map showed two residential structures located at the eastern portion of the Site. The remaining areas of the Site were vacant and undeveloped. An additional residential structure had been built at the northwest corner of the Site by 1900. The 1914 Sanborn Map showed that the abovementioned structures located at the Site had been removed. Two residential structures were observed at the western portion of the Site. There was a church at the eastern portion of the Site. The two residential structures located at the western portion of the Site were removed by 1950. The church was enlarged to cover the entire parcel in 1950. There were no significant changes to the Site in the 1965, 1975, 1988, 1990, and 1999 Sanborn Maps relative to the 1950 Sanborn Map.

Neighboring Area

The neighboring area surrounding the Site was generally vacant and undeveloped in 1886. Several residential structures were present west and south of the Site. The 1900 and 1914 Sanborn Maps showed that additional residential structures had been built north, south, and west of the Site. Residential structures occupied the parcels located on the east side of Eureka Street and east of the Site by 1950. There were no noticeable changes to the neighboring area in the 1965, 1975, 1988, 1990, and 1999 Sanborn Maps relative to the 1950 Sanborn Map.

Environmental Lien and AUL Report

An environmental lien and "activity or use limitation" (AUL) search was conducted by EDR dated October 26, 2016 (Appendix E). No environmental liens or AULs were found for the Site.

City Directory Review

A search of historic city directories was performed by EDR for the Site on October 24, 2016 (Appendix F). Directories were available and reviewed. The results of the city directory search are summarized below:

150 Eureka Street

Year(s)	Occupant Listed
1910	FRANK TAYLBOR, HENRY TAYLOR
1915, 1925, 1930, 1935, 1940, 1944, 1949, 1953, 1958, 1962, 1966	CENTRAL BAPTIST CHURCH
1971, 1977	VOICE OF PENTECOST CHURCH
1982	METROPOLITAN COMMUNITY CHURCH OF
1985	METROPOLITAN COMMUNITY CHURCH OF SF
1990	METROPOLITAN COMMUNTIY CHURCH OF SF, CONGREGATION AHAVAT SHALOM, ARIO BL
1993, 2000, 2006, 2013	METROPOLITAN COMMUNITY CHURCH OF SF

Interview with Property Owner

Pursuant to ASTM E1527-13, the following interview was performed during this assessment to obtain historical information on the former activities that were conducted at the Site.

As part of the interview process, an Environmental Questionnaire (Appendix G) was completed by Mr. David Papale, Managing Partner of 150 Eureka Street, LLC (owner of the Site). A summary of the interview is presented below.

The property has been owned by 150 Eureka Street, LLC since February 2015. According to Mr. Papale, the Site has been historically occupied by a church. The church is currently vacant. The previous occupant of the Site was the Metropolitan Community Church of San Francisco.

Records Review

Regulatory records were reviewed to evaluate whether the Site has been subject to regulatory action by federal, state, or local environmental agencies.

Based on the information provided by EDR, the files for the Site were requested.

The Site

A file review for the Site indicated that there were no files available at the San Francisco Department of Public Health (SF-DPH). Additionally, no files were available for the Site on the State Water Board's Geotracker database and State Department of Toxic Substances Control's Envirostor database.

4.5 Environmental Investigations

No previous environmental investigations were provided for the Site.

4.6 Radon

Radon is a naturally-occurring, odorless, invisible gas. Natural radon levels vary and are closely related to geologic formations. Radon may enter building through basement sumps or other openings.

The US EPA has prepared a map to assist National, State, and local organizations to target their resources and to implement radon-resistant building codes. The map divides the country into three Radon Zones, Zone 1 being those areas with the average predicted indoor radon concentration in residential dwellings exceeding the EPA Action limit of 4 pico curies per liter of air (pCi/l). It is important to note that the EPA has found homes with elevated levels

of radon in all three zones, and the EPA recommends site specific testing in order to determine radon levels at a specific location. However, the map does give a valuable indication of the propensity of radon gas accumulation in structures.

Radon sampling was not performed as part of this assessment. According to the US EPA, the radon zone for the area is Zone 2, which has a predicted average indoor screening level between 2.0 pCi/l and 4.0 pCi/l, equal to or below the action level of 4.0 pCi/l set forth by the EPA.

4.7 Asbestos and Lead

Asbestos and lead samples were not collected as part of the scope of work of this Phase I ESA. Based on the age of the existing structure at the Site, it is possible that asbestos-containing materials (ACMs) and lead-based paint were utilized in the construction of the existing structure. During demolition, renovation, or any activity that may disturb the building materials, the materials should be inspected by a licensed professional for the potential presence of ACMs and lead.

4.8 Vapor Intrusion Condition

Based on ICES's review of historical and current usage of the Site as well as our review of the State and Federal databases for onsite and adjacent properties of potential concern for vapor intrusion, a vapor intrusion condition (VIC) is highly unlikely to exist nor is a VIC suspected to have impacted the environmental integrity of the Site. Based on the foregoing, no further action is warranted at this time with respect to a potential on-site or adjoining VIC. Notwithstanding, vapor sampling and testing are the only definitive means of verifying a VIC.

5.0 FINDINGS AND CONCLUSIONS

Findings

Recognized Environmental Conditions (RECs) are defined by the ASTM Standard Practice E1527-13 as the presence of likely presence of any hazardous substances or petroleum products in, on, or at a property: due to release to the environment; under conditions indicative of a release to the environment; or under conditions that pose a material threat of a future release to the environment.

ICES identified no on-site RECs during the course of this assessment.

Controlled Recognized Environmental Conditions (CRECs) are defined by the ASTM Standard Practice E1527-13 as a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority, with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls.

No on-site CRECs were identified by ICES during the course of this assessment.

Historical Recognized Environmental Condition (HREC) is defined by the ASTM Practice E1527-13 as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority, without subjecting the property to any required controls.

ICES identified no onsite HRECs during the course of this assessment.

Environmental Issues include environmental concerns identified by ICES that warrant discussion, but do not qualify as recognized environmental conditions, as defined by the ASTM Standard Practice E1527-13.

Due to the age of the existing structure at the southeast portion of the Site, it is possible that asbestos containing materials (ACMs) and lead-based paint were utilized in the construction of the existing structure. During demolition, renovation, or any activity that may disturb the building materials, the materials should be inspected by a licensed professional for the potential presence of ACMs and lead.

Conclusions

ICES has performed a Phase I Environmental Site Assessment in conformance with the Scope of Work required by ASTM E1527-13 for 150 Eureka Street located in the City and County of San Francisco, California. This assessment has revealed no evidence of recognized environmental conditions associated with the Site. ICES recommends no further investigations for the Site at this time.

The evaluation is site specific, based on the information available

at this time and could be revised if new information necessitating further review of the Site and adjacent facilities becomes available.

6.0 SIGNATURE OF ENVIRONMENTAL PROFESSIONAL

By signing this report, the author declares that, to the best of his professional knowledge and belief, he meets the definition of Environmental Professional as defined in ASTM 1527-13.

The author as the specific qualifications based on education, training, and experience to assess a property of the nature, history and setting of the subject property. The author has developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in ASTM 1527-13.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

TARGET PROPERTY INFORMATION

ADDRESS

150 EUREKA STREET
SAN FRANCISCO, CA 94114

COORDINATES

Latitude (North): 37.7599000 - 37° 45' 35.64"
Longitude (West): 122.4385060 - 122° 26' 18.62"
Universal Transverse Mercator: Zone 10
UTM X (Meters): 549459.4
UTM Y (Meters): 4179119.2
Elevation: 174 ft. above sea level

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal RCRA generators list

RCRA-LQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

A review of the RCRA-LQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 2

EXECUTIVE SUMMARY

RCRA-LQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
RITZ CAMERA #1057	499 CASTRO ST	ENE 1/8 - 1/4 (0.195 mi.)	G39	53
CVS PHARMACY #2708	445 CASTRO ST	ENE 1/8 - 1/4 (0.224 mi.)	J40	54

RCRA-SQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

A review of the RCRA-SQG list, as provided by EDR, and dated 06/21/2016 has revealed that there are 4 RCRA-SQG sites within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WALGREENS 4318	4129 18TH ST	ENE 1/8 - 1/4 (0.148 mi.)	G26	23
OFF CASTRO CLEANERS	4107 19TH ST	ESE 1/8 - 1/4 (0.176 mi.)	H33	39
WALGREENS 1327	498 CASTRO ST	ENE 1/8 - 1/4 (0.188 mi.)	G35	43
CASTRO CLEANERS	4451 18TH ST	ENE 1/8 - 1/4 (0.242 mi.)	41	59

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

A review of the RCRA-CESQG list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA-CESQG site within approximately 0.25 miles of the target property.

<u>Lower Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
WALGREENS #4318	4129 18TH ST	ENE 1/8 - 1/4 (0.148 mi.)	G27	24

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 08/01/2016 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

State and tribal leaking storage tank lists

LUST: The Leaking Underground Storage Tank Incident Reports contain an inventory of reported leaking underground storage tank incidents. The data come from the State Water Resources Control Board Leaking Underground Storage Tank Information System.

A review of the LUST list, as provided by EDR, has revealed that there are 37 LUST sites within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the State Water Resources Control Board's Hazardous Substance Storage Container Database.

A review of the UST list, as provided by EDR, has revealed that there are 8 UST sites within approximately 0.25 miles of the target property.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Lists of Registered Storage Tanks

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 06/21/2016 has revealed that there is 1 RCRA NonGen / NLR site within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Auto: EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Auto list, as provided by EDR, has revealed that there is 1 EDR Hist Auto site within approximately 0.125 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
Not reported	243 DIAMOND ST	SE 0 - 1/8 (0.125 mi.)	D25	22

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there are 20 EDR Hist Cleaner sites within approximately 0.125 miles of the target property.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

facilities.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: N/A
Date Made Active in Reports: 04/15/2016	Last EDR Contact: 10/05/2016
Number of Days to Update: 10	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/07/2016	Source: EPA

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

Date of Government Version: 09/14/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/04/2016	Telephone: 703-603-8704

Number of Days to Update: 17	Next Scheduled EDR Contact: 01/16/2017
	Data Release Frequency: Varies

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Number of Days to Update: 10	Next Scheduled EDR Contact: 01/30/2017
	Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Date of Government Version: 03/07/2016	Source: EPA
Date Data Arrived at EDR: 04/05/2016	Telephone: 800-424-9346

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895
Date Made Active in Reports: 09/02/2016	Last EDR Contact: 09/28/2016
Number of Days to Update: 64	Next Scheduled EDR Contact: 01/09/2017

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895

Number of Days to Update: 64	Next Scheduled EDR Contact: 01/09/2017
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/21/2016	Source: Environmental Protection Agency
Date Data Arrived at EDR: 06/30/2016	Telephone: (415) 495-8895

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 08/30/2016	Source: Drug Enforcement Administration

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

WASTEWATER PITS: Oil Wastewater Pits Listing

Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water board's review found that more than one-third of the region's active disposal pits are operating without permission.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historic Gas Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principal investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

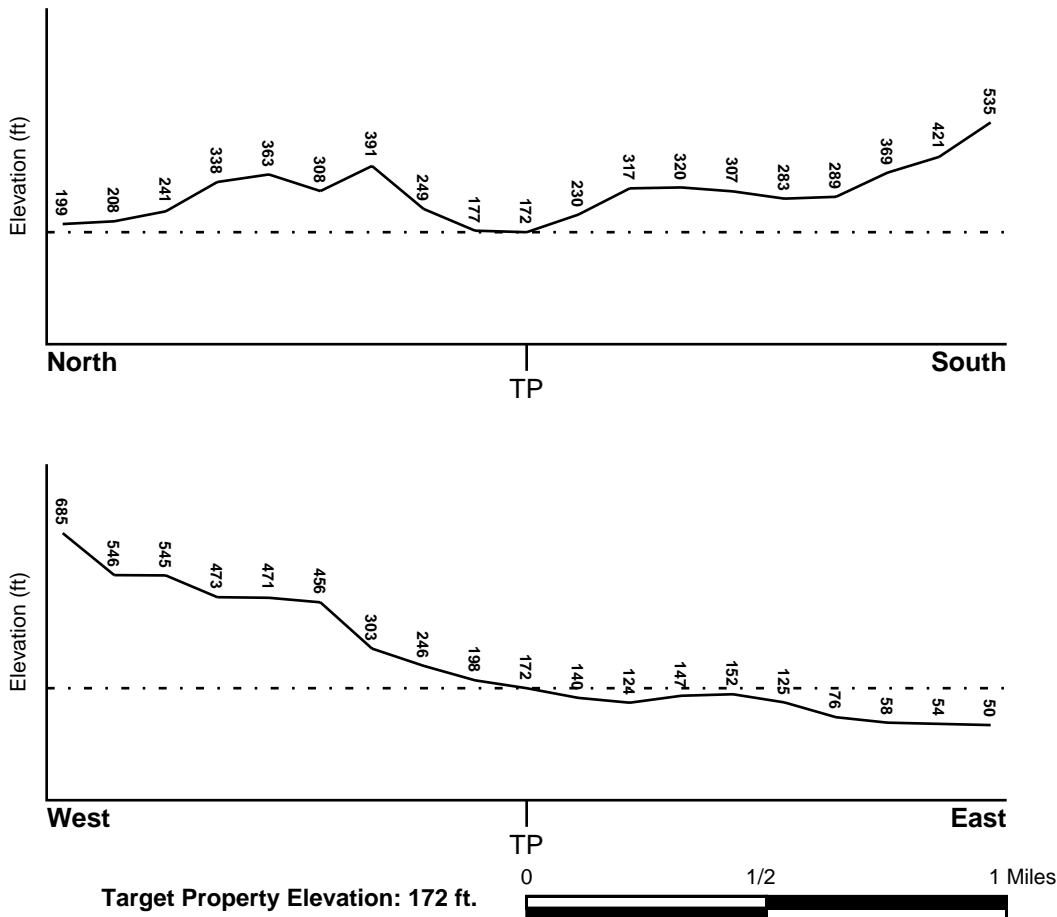

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK[®] - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	5 inches		Not reported	Not reported	Max: 0.01 Min: 0	Max: Min:

Soil Map ID: 2

Soil Component Name: Urban land

Soil Surface Texture:
Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class:
Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish & Game

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

Emeryville, CA 94662
Contact: Derek Wong

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

Search Results:

Year	Scale	Details	Source
2012	1"=500'	Flight Year: 2012	USDA/NAIP
2010	1"=500'	Flight Year: 2010	USDA/NAIP

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by ICES were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

October 26, 2016

EDR Environmental Lien and AUL Search

EDR Environmental Lien and AUL Search

The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders' offices, registries of deeds, county clerks' offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1910 through 2013. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 332 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR is licensed to reproduce certain City Directory works. Reproduction of City Directories without permission of the publisher may be a violation of copyright.

APPENDIX G

ENVIRONMENTAL QUESTIONNAIRE

ENVIRONMENTAL QUESTIONNAIRE

Site Name/Address: 150 EUREKA STREET

Property's Owner Name: 150 EUREKA STREET, LLC

Date of Ownership: 2/2015

Current use of property: CHURCH

Current occupant: VACANT

Past use(s) of property: CHURCH

Previous occupant(s) of property: METROPOLITAN COMMUNITY CHURCH
OF SAN FRANCISCO
MCCSF

This questionnaire was completed by:

Name: DAVID PAPACK

Title: PARTNER

Signature: 

Date: 10/25/14

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

2. Are you aware of any AULs (Activity and Land Use Limitations), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal state or local law?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

3. Do you have any specialized knowledge, specific information and or direct experience in relation to hazardous chemicals (types, quantities, processes, disposal techniques) used at the property or nearby properties?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

4. Does the price being paid for this property reasonably reflect the fair market value of the property?

YES	X
NO	

If you answer no, please include an explanation in the space provided below, including whether the lower purchase price is because contamination is known or believed to be present at the property?

5. Are you aware of any known or reasonably ascertainable information about the property that would help the environmental professional to identify conditions indicative of releases or threatened releases? For example:

a. Do you know the past uses of the property?

YES	<input checked="" type="checkbox"/>
NO	<input type="checkbox"/>

b. Do you know of any specific chemicals that are present or once were present at the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

c. Do you know of spills or other chemical releases that have taken place at the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

d. Do you know of any environmental cleanups that have taken place at the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

e. Do you know of any environmental violations in connection with the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

If you answered yes to any questions above, please include an explanation in the space provided below:

6. Based on your knowledge and experience related to the property are there any obvious indicators that point to the presence of contamination at the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

7. Is the property or any adjoining property currently used for industrial use?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

8. Did you observe evidence or do you have any prior knowledge that the property or adjoining property has been used for an industrial use in the past?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

9. Is the property or adjoining property currently or previously used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, landfill, waste treatment, storage, disposal, processing, or recycling facility?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

10. Are there currently or were there previously any discarded auto or industrial batteries, or other chemicals greater than 5 gallons in volume or 50 gallons at the property?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

11. Did you observe evidence or do you have prior knowledge that fill dirt has been brought onto the property that originated from a contaminated site or that is of an unknown origin?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

12. Are there currently or were there previously any pits, ponds, or lagoons located on the property in connection with waste treatment or waste disposal?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

13. Is there currently, or was there previously any stained soil located on the property?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

14. Are there currently or were there previously any registered or unregistered storage tanks (above or underground) located on the property?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

15. Are there currently or were there previously any vent pipes, fill pipes, or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

16. Is there currently or was there previously evidence of leaks, spills or staining by substances other than water, or foul odors, associated with any flooring, drains, walls, ceiling, or exposed grounds on the property?

YES	X
NO	

If you answer yes, please include an explanation in the space provided below:

DRY ROT

17. If the property is served by a private well or non-public water system, do you have any knowledge that contaminants have been identified in the well or system that exceed allowable limits?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

18. Do you know of any past, threatened, pending, violations of environmental laws, lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?

YES	
NO	X

If you answer yes, please include an explanation in the space provided below:

19. Have you been informed of the current or past use existence of hazardous substances or petroleum products with respect to the property or any facility located on the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

20. Do you have any knowledge of any environmental assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on, or contamination of, the property or recommended further assessment of the property?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

21. Does the property discharge any waste water (not including sanitary waste or storm water) onto the property and/or into a sanitary sewer system or storm water system?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

22. Is there a transformer, capacitor, any hydraulic equipment, for which there any records indicating the presence of PCBs?

YES	<input type="checkbox"/>
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

23. Have any hazardous substances or petroleum products, tires, auto or industrial batteries or any waste materials been dumped above grade, buried and/or burned on the property?

YES	
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

24. Are there currently or were there previously any water monitoring wells located on the property?

YES	
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

25. Are there currently or were there previously any water monitoring wells located on any adjacent and/or nearby properties?

YES	
NO	<input checked="" type="checkbox"/>

If you answer yes, please include an explanation in the space provided below:

APPENDIX H

QUALIFICATIONS

PENG K. LEONG

Principal Engineer

EDUCATION

University of California: M.S. Civil Engineering
University of Toronto : B.S. Civil Engineering

REGISTRATION

California Professional Civil Engineer: C039707
California Contractor - A/B/Haz : 533371

PROFESSIONAL HISTORY

Innovative & Creative Environmental Solutions, Principal Engineer, 1992-date
Levine*Fricke, Inc., Senior Associate Engineer, 1988-1992
Parsons Brinckerhoff Quade & Douglas, Inc., Senior Engineer, 1985-1988
Kitchell CEM, Project Coordinator, 1984-1985
CRS/Sirrine, Geotechnical Engineer, 1982-1984
University of Toronto, Research Engineer, 1979-1981

REPRESENTATIVE EXPERIENCE

Mr. Leong has a diverse background in environmental, geotechnical and construction engineering. Within the past thirty years, he has managed and peer reviewed numerous projects ranging from investigation, characterization, and remediation of petroleum hydrocarbons, organic solvents, pesticides, volatile and semi-volatile organic compounds, and heavy metals in soil and groundwater. He has worked closely with regulatory agencies to develop innovative strategies, remedial action plans, air monitoring programs, and implemented health and safety programs for field remedial activities. Additionally, Mr. Leong also evaluated engineering design and construction documents for completeness and compliance with program requirements.

PENG K. LEONG
Principal Engineer

Mr. Leong is well known for his trouble-shooting abilities and has applied these skills to bring complicated and challenging projects to a rapid conclusion.

Mr. Leong has been involved in the preliminary design of nuclear waste repositories where he conducted thermomechanical and sensitivity analyses to optimize emplacement configurations while balancing regulatory technical needs with physical site limitations and economic constraints. His responsibility included designing and implementing the document control QA/QC system. He has also managed the construction of numerous commercial structures and facilities including, but not limited to, correctional facilities, steel mills, steel and concrete buildings, and gas stations. He has conducted site evaluations, supervised geotechnical investigations, and reviewed foundation specifications for commercial structures, mine processing plants, and expansion of a hydroelectric power plant.

PUBLICATIONS

Leong, P.K. and Curran, J.H., 1983, "Influence of Shear Velocity on Rock Joint Strength," 5th International Congress on Rock Mechanics, Melbourne, Australia.

Leong, P.K., 1982, "A Review of Techniques Pertaining to Rock Reinforcement Design."

RE: 150 Eureka

Job Number: 06.182

This is an executive summary of my findings regarding the wood frame structure at 150 Eureka. The original building appears to be circa 1900 and was built as a one-story church. The original building has undergone two additions. The first addition, a two-story structure, was made at the rear of the original church. This addition included reframing the original rear wall of the original church. The second addition, also two stories, has an assembly space in the rear second floor. The building permit history of the building is not complete since no record exists for either addition while the building permit is on file for the original one-story church. I have been involved with this facility for a number of years so I am very familiar with the building. My first engagement regarding this building was concerning one wood "truss" in the original building at the first addition. This "non-existent truss" required shoring and I have continued to monitor the shoring. It was my opinion that the truss issue was a significant issue among possibly many issues and the church leader had to address the viability of the building being a structure that could be maintained into the future. I believed that the church structure, including the rear additions, would need substantial work with substantial cost to maintain the building for its long-term use. I suggested that the viability of the building be fully explored. This long-termed viability had to do with the "bones" of the building and not the general upkeep. Over my years of interaction with this structure, the maintenance is above par for a non-profit organization. The more basic issue was how well was the original building and two additions were constructed and/or had the building outlived its useful life?

Recently, I was engaged to look at a failed rear retaining wall. This wall was in the second addition and supported the rear assembly room. The failed wall posed a significant life safety risk and, in my opinion, the building needed to be vacated and shored. The building was immediately vacated and then shored on July 4, 2006 and has continued to be vacated while I did a general review of the infrastructure of the building. This included bringing in a Fire Protection Engineer (FPE) and a Structural Pest Consultant (SPC). The SPC was bought in due to the significant amount of water found in the soil at the failed rear retaining wall and the associated dry rot/termite damage in the wood. The FPE agrees with my assessment that the life safety protection in the rear addition is totally inadequate. The assembly room in the rear addition appeared to me to be a "fire trap". The FPE took a more pragmatic approach and said the entire building needs to be upgraded completely (including sprinklers). The Fire Department, Bureau of Fire Protection would require a complete upgrade if they saw the condition of the building. The FPE suggests a tear down due to the amount of life safety work required and obvious code upgrade in this building. This was because the value of the existing building was not worth the cost to upgrade. This gets back to my initial concerns with the bones/infrastructure of the building. The SPC arrived at the same conclusion but by a different path. Due to the significant amount of ground water and the way the original/additions were built, he stated that the only way to resolve the water/dry rot/termite issue was to gut the entire first level, shore the roof and second floor in the air, and reconstruct the first level and foundation. The construction cost for this work far exceeds the value of the remaining second floor & roof of the building. The cost disproportions was so obvious that "smaller" issues regarding the façade dry rot behind the stucco and the destabilize wood ceiling in the rear assembly room were not considered.

C:\Documents and Settings\meyer\Local Settings\Temporary Internet Files\OLK22\06 182 - 150 Eureka.doc

In any other building, these issues alone would have been significant. The structural pest problem due to the water has overshadowed any other concern.

In my opinion and in the opinion of the other two consultants, the work/cost is so disproportional to the value of the remaining building, the building should be considered for demolition. These three opinions were not cumulative. Each of the opinions were arrived at by looking at a specific issue (with relative cost) and required mandatory code upgrade, and each of us determined that the building had little economic value. It is important to note that if all three opinions were overlaid and a master plan were developed, the conclusion would only get worse as a cumulative problem. In addition, a more complete master plan would bring in more issues that would require to be addressed. An example is disabled access. The level of work being discussed would require substantial disabled access work. I also believe your mechanical, electrical and plumbing are all near the end of their life span.

In summary, the building has little "engineering" economic value in any evaluation of the building. However, I would suggest that two other areas of "economic" value be reviewed as part of this overall master plan. The first is the buildings potential historic value to the community. The second is the value of the non-conforming structure in the rear yard. The current layout of the building on the lot most likely exceeds the "as-right" layout per the current Planning Code. Thus, if you tear down the current building, the Planning Department may not let you rebuild the same footprint of a building on this lot. This maybe a good thing or a bad thing, but the issue of what Planning will let you replace this building with (on this lot), should be considered in the evaluation of the current building.

Sincerely,

Patrick Buscovich

RE: Closure of 150 Street Church Facility

Job Number: 06.182

Dear Toby,

You have asked that I confirm my structural engineering opinion regarding the Church's facility at 150 Eureka. This is to confirm that I conducted numerous site inspections during June 2006 and found that due to a failed wall, the structure posed a significant life safety. This risk resulted in my strong recommendation that the building be vacated.

If you have any questions, please feel free to call (415) 788-2708 x102.
