

SAN FRANCISCO PLANNING DEPARTMENT

Certificate of Determination EXEMPTION FROM ENVIRONMENTAL REVIEW

Case No.: 2009.1011E
 Project Address: 1801 and 1863 Mission Street
 Zoning: UMU (Urban Mixed Use) and Mission Street NCT
 (Neighborhood Commercial Transit), respectively
 68-X and 40-X/65-X, respectively
 Block/Lot: 3548/039 and 3548/033, respectively
 Lot Size: 3,600 square feet and 8,000 square feet, respectively
 Plan Area: Eastern Neighborhoods (Mission)
 Project Sponsor: Stephen Antonaros, Architect
 (415) 864-2261, santonaros@sbcglobal.net
 Staff Contact: Michael Li
 (415) 575-9107, michael.j.li@sfgov.org

PROJECT DESCRIPTION

The project site consists of two non-contiguous parcels, 1801 Mission Street (Block 3548, Lot 039) and 1863 Mission Street (Block 3548, Lot 033), in San Francisco's Mission neighborhood. Lot 039 is an approximately 3,600-square-foot rectangular parcel on the southeast corner of 14th and Mission streets, and Lot 033 is an approximately 8,000-square-foot rectangular parcel on the east side of Mission Street between 14th and 15th streets. Lot 033 is a through lot that has a second frontage on Minna Street. Both parcels are currently vacant, but there is a small storage shed near the southeast corner of Lot 039. Both parcels were previously used as surface parking lots.

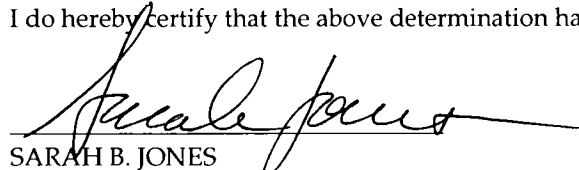

(Continued on next page)

EXEMPT STATUS

Exempt per Section 15183 of the California Environmental Quality Act (CEQA) Guidelines and California Public Resources Code Section 21083.3.

DETERMINATION

I do hereby certify that the above determination has been made pursuant to State and Local requirements.

 SARAH B. JONES
 Environmental Review Officer

March 19, 2015
 Date

cc: 1801 Mission LLC and 1863 Mission LLC, Project Sponsor
 Chris Townes, Current Planning Division
 Supervisor David Campos, District 9

Virna Byrd, M.D.F.
 Exclusion/Exemption Dist. List

In total, the proposed project would provide 54 dwelling units (22 studios, five one-bedroom units, and 27 two-bedroom units), approximately 2,125 square feet of retail space, approximately 740 square feet of office space, 25 off-street parking spaces, 68 Class 1 bicycle parking spaces, and one Class 2 bicycle parking space.

At 1801 Mission Street, the project sponsor would construct a seven-story, 68-foot-tall, approximately 22,610-square-foot mixed-use building containing 17 dwelling units, approximately 1,110 square feet of ground-floor retail space, approximately 740 square feet of second-floor office space, seven parking spaces, and 28 Class 1 bicycle parking spaces. A total of approximately 2,430 square feet of usable open space would be provided. The parking garage would be accessed from 14th Street. Of the seven parking spaces being provided, two would be at grade, and the other five would be housed in a mechanical stacker. The Class 1 bicycle parking spaces would be located in secure storage rooms on the first and second floors. This building would rest on a mat foundation that is supported by deep-seated piers or densified soils; pile driving could be required. Construction of this building would require the excavation and removal of approximately 1,400 cubic yards of soil.

At 1863 Mission Street, the project sponsor would construct an approximately 35,265-square-foot mixed-use building that would be four stories and 38 feet tall along Minna Street and seven stories and 65 feet tall along Mission Street. The building would contain 37 dwelling units, approximately 1,015 square feet of retail space, 18 parking spaces, 40 Class 1 bicycle parking spaces, and one Class 2 bicycle parking space. A total of approximately 3,790 square feet of usable open space would be provided. The parking garage would be accessed from Minna Street. All 18 parking spaces would be housed in a mechanical stacker. The Class 1 and Class 2 bicycle parking spaces would be inside the building on the first floor. This building would rest on a mat foundation; pile driving would not be required. Construction of this building would require the excavation and removal of approximately 4,100 cubic yards of soil.

PROJECT APPROVAL

For the purposes of environmental review, the buildings are being analyzed together as if they were a single project. For the purposes of the approval/entitlement process, the buildings are considered two separate projects.

The proposed building at 1801 Mission Street requires the following approvals:

- **Site/Building Permit** (*Planning Department and Department of Building Inspection*)
- **Condominium Map** (*Department of Public Works*)

Issuance of the building permit by the Department of Building Inspection would constitute the Approval Action for the proposed building at 1801 Mission Street. The Approval Action date establishes the start of the 30-day appeal period for this CEQA exemption determination pursuant to Section 31.04(h) of the San Francisco Administrative Code.

The proposed building at 1863 Mission Street requires the following approvals:

- **Site/Building Permit** (*Planning Department and Department of Building Inspection*)
- **Condominium Map** (*Department of Public Works*)

Issuance of the building permit by the Department of Building Inspection would constitute the Approval Action for the proposed building at 1863 Mission Street. The Approval Action date establishes the start of the 30-day appeal period for this CEQA exemption determination pursuant to Section 31.04(h) of the San Francisco Administrative Code.

COMMUNITY PLAN EXEMPTION OVERVIEW

California Public Resources Code Section 21083.3 and CEQA Guidelines Section 15183 provide an exemption from environmental review for projects that are consistent with the development density established by existing zoning, community plan, or general plan policies for which an Environmental Impact Report (EIR) was certified, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site. Section 15183 specifies that examination of environmental effects shall be limited to those effects that: (a) are peculiar to the project or parcel on which the project would be located; (b) were not analyzed as significant effects in a prior EIR on the zoning action, general plan, or community plan with which the project is consistent; (c) are potentially significant off-site and cumulative impacts that were not discussed in the underlying EIR; or (d) are previously identified in the EIR, but which, as a result of substantial new information that was not known at the time that the EIR was certified, are determined to have a more severe adverse impact than that discussed in the underlying EIR. Section 15183(c) specifies that if an impact is not peculiar to the parcel or to the proposed project, then an EIR need not be prepared for the project solely on the basis of that impact.

This determination evaluates the potential project-specific environmental effects of the 1801 and 1863 Mission Street project described above, and incorporates by reference information contained in the Programmatic EIR for the Eastern Neighborhoods Rezoning and Area Plans (PEIR).¹ Project-specific studies were prepared for the proposed project to determine if the project would result in any significant environmental impacts that were not identified in the Eastern Neighborhoods PEIR.

After several years of analysis, community outreach, and public review, the Eastern Neighborhoods PEIR was adopted in December 2008. The Eastern Neighborhoods PEIR was adopted in part to support housing development in some areas previously zoned to allow industrial uses, while preserving an adequate supply of space for existing and future production, distribution, and repair (PDR) employment and businesses. The Eastern Neighborhoods PEIR also included changes to existing height and bulk districts in some areas, including the project site at 1801 and 1863 Mission Street.

The Planning Commission held public hearings to consider the various aspects of the proposed Eastern Neighborhoods Rezoning and Area Plans and related Planning Code and Zoning Map amendments. On August 7, 2008, the Planning Commission certified the Eastern Neighborhoods PEIR by Motion No. 17659 and adopted the Preferred Project for final recommendation to the Board of Supervisors.^{2,3}

In December 2008, after further public hearings, the Board of Supervisors adopted and the Mayor signed the Planning Code amendments related to the Eastern Neighborhoods Rezoning and Area Plans. New

¹ San Francisco Planning Department Case No. 2004.0160E and State Clearinghouse No. 2005032048.

² San Francisco Planning Department, *Eastern Neighborhoods Rezoning and Area Plans Final Environmental Impact Report*, Case No. 2004.0160E, certified August 7, 2008. Available online at: <http://www.sf-planning.org/index.aspx?page=1893>, accessed January 26, 2015.

³ San Francisco Planning Commission Motion No. 17659, August 7, 2008. Available online at: <http://www.sf-planning.org/Modules/ShowDocument.aspx?documentid=1268>, accessed January 26, 2015.

zoning districts include districts that would permit PDR uses in combination with commercial uses; districts mixing residential and commercial uses and residential and PDR uses; and new residential-only districts. The districts replaced existing industrial, commercial, residential single-use, and mixed-use districts.

The Eastern Neighborhoods PEIR is a comprehensive programmatic document that presents an analysis of the environmental effects of implementation of the Eastern Neighborhoods Rezoning and Area Plans, as well as the potential impacts under several proposed alternative scenarios. The *Eastern Neighborhoods Draft EIR* evaluated three rezoning alternatives, two community-proposed alternatives which focused largely on the Mission District, and a “No Project” alternative. The alternative selected, or the Preferred Project, represents a combination of Options B and C. The Planning Commission adopted the Preferred Project after fully considering the environmental effects of the Preferred Project and the various scenarios discussed in the PEIR.

A major issue of discussion in the Eastern Neighborhoods rezoning process was the degree to which existing industrially zoned land would be rezoned to primarily residential and mixed-use districts, thus reducing the availability of land traditionally used for PDR employment and businesses. Among other topics, the Eastern Neighborhoods PEIR assesses the significance of the cumulative land use effects of the rezoning by analyzing its effects on the City's ability to meet its future PDR space needs as well as its ability to meet its housing needs as expressed in the City's *General Plan*.

As a result of the Eastern Neighborhoods rezoning process, the project site has been rezoned to a UMU (Urban Mixed Use) District and the Mission Street NCT (Neighborhood Commercial Transit) District. These districts are intended to promote a vibrant mix of uses while maintaining the characteristics of this formerly industrially zoned area while optimizing the available access to existing public transportation. They are also intended to serve as a buffer between residential districts and PDR districts in the Eastern Neighborhoods. The proposed project and its relation to PDR land supply and cumulative land use effects is discussed further in the Community Plan Exemption (CPE) Checklist, under Land Use. The 1801 and 1863 Mission Street lots, which are located in the Mission Plan Area of the Eastern Neighborhoods program, were designated as 68-X and 40-X/65-X Height and Bulk Districts, respectively. This would allow a building up to 68 feet in height at the southeast corner of 14th and Mission streets, a building up to 40 feet in height fronting Minna Street, and a building up to 65 feet in height fronting Mission Street.

Individual projects that could occur in the future under the Eastern Neighborhoods Rezoning and Area Plans will undergo project-level environmental evaluation to determine if they would result in further impacts specific to the development proposal, the site, and the time of development and to assess whether additional environmental review would be required. This determination concludes that the proposed project at 1801 and 1863 Mission Street is consistent with and was encompassed within the analysis in the Eastern Neighborhoods PEIR. This determination also finds that the Eastern Neighborhoods PEIR adequately anticipated and described the impacts of the proposed 1801 and 1863 Mission Street project and identifies the mitigation measures applicable to the 1801 and 1863 Mission Street project. The proposed project is also consistent with the zoning controls and the provisions of the

Planning Code applicable to the project site.^{4,5} Therefore, no further CEQA evaluation for the 1801 and 1863 Mission Street project is required. In sum, the Eastern Neighborhoods PEIR and this Certificate of Exemption for the proposed project comprise the full and complete CEQA evaluation necessary for the proposed project.

PROJECT SETTING

The project site is located on the block bounded by 14th, Mission, 15th, and Minna streets in San Francisco's Mission neighborhood and consists of residential, commercial, and industrial uses. The surrounding buildings vary in appearance and height; two- and three-story buildings are generally multi-family residential in character and consist of wood-frame construction, while the shorter one- and two-story buildings are of more industrial appearance consisting of masonry and concrete construction materials. The State Armory and Arsenal is on the west side of Mission Street across from the project site; this building reaches a maximum height of approximately 65 feet, is clad entirely in brick, and is unique in its architectural form.

POTENTIAL ENVIRONMENTAL EFFECTS

The Eastern Neighborhoods PEIR included analyses of environmental issues including: land use; plans and policies; visual quality and urban design; population, housing, business activity, and employment (growth inducement); transportation; noise; air quality; parks, recreation, and open space; shadow; archeological resources; historic architectural resources; hazards; and other issues not addressed in the previously issued Initial Study for the Eastern Neighborhoods Rezoning and Area Plans. The proposed 1801 and 1863 Mission Street project is in conformance with the height, use and density for the site described in the Eastern Neighborhoods PEIR and would represent a small part of the growth that was forecast for the Eastern Neighborhoods plan areas. Thus, the plan analyzed in the Eastern Neighborhoods PEIR considered the incremental impacts of the proposed 1801 and 1863 Mission Street project. As a result, the proposed project would not result in any new or substantially more severe impacts than were identified in the Eastern Neighborhoods PEIR.

Significant and unavoidable impacts were identified in the Eastern Neighborhoods PEIR for the following topics: land use, historic architectural resources, transportation and circulation, and shadow. The proposed project would not remove any existing PDR uses and would therefore not contribute to any land use impact. The proposed project would not result in demolition, alteration, or modification of any historic resources. Therefore, the proposed project would not contribute to any historic resource impact. Traffic and transit ridership generated by the proposed project would not considerably contribute to the traffic and transit impacts identified in the Eastern Neighborhoods PEIR. Although at its highest point the proposed project would reach approximately 68 feet in height, the proposed project would not cast shadow on any parks or open spaces.

The Eastern Neighborhoods PEIR identified feasible mitigation measures to address significant impacts related to noise, air quality, archeological resources, historical resources, hazardous materials, and

transportation. **Table 1** lists the mitigation measures identified in the Eastern Neighborhoods PEIR and states whether each measure would apply to the proposed project.

Table 1 – Eastern Neighborhoods PEIR Mitigation Measures

Mitigation Measure	Applicability
E. Transportation	
E-1: Traffic Signal Installation	Not applicable: Plan-level mitigation by San Francisco Municipal Transportation Agency (SFMTA).
E-2: Intelligent Traffic Management	Not applicable: Plan-level mitigation by SFMTA.
E-3: Enhanced Funding	Not applicable: Plan-level mitigation by SFMTA & San Francisco County Transportation Authority.
E-4: Intelligent Traffic Management	Not applicable: Plan-level mitigation by SFMTA & Planning Department.
E-5: Enhanced Transit Funding	Not applicable: Plan-level mitigation by SFMTA.
E-6: Transit Corridor Improvements	Not applicable: Plan-level mitigation by SFMTA.
E-7: Transit Accessibility	Not applicable: Plan-level mitigation by SFMTA.
E-8: Muni Storage and Maintenance	Not applicable: Plan-level mitigation by SFMTA.
E-9: Rider Improvements	Not applicable: Plan-level mitigation by SFMTA.
E-10: Transit Enhancement	Not applicable: Plan-level mitigation by SFMTA
E-11: Transportation Demand Management	Not applicable: Plan-level mitigation by SFMTA
F. Noise	
F-1: Construction Noise (Pile Driving)	Applicable: Project includes pile driving. Project Mitigation Measure M-NO-1.
F-2: Construction Noise	Applicable: Temporary construction noise from use of heavy equipment. Project Mitigation Measure M-NO-2.
F-3: Interior Noise Levels	Applicable: Noise-sensitive uses where street noise exceeds 60 dBA. Requirement satisfied by sponsor.

Mitigation Measure	Applicability
F-4: Siting of Noise-Sensitive Uses	Applicable: Project includes siting of residential space in where street noise exceeds 60 dBA. Requirement satisfied by sponsor.
F-5: Siting of Noise-Generating Uses	Not applicable: Project would not include noise-generating uses.
F-6: Open Space in Noisy Environments	Applicable: Project includes open space where street noise exceeds 60 dBA. Project Mitigation Measure M-NO-3.
G. Air Quality	
G-1: Construction Air Quality	Applicable: Project required to comply with Construction Dust Control Ordinance; project located in area of poor air quality. Project Mitigation Measure M-AQ-1.
G-2: Air Quality for Sensitive Land Uses	Not applicable: Project required to comply with Health Code Article 38.
G-3: Siting of Uses that Emit Diesel Particulate Matter (DPM)	Not applicable: Project would not include uses that emit DPM.
G-4: Siting of Uses that Emit other Toxic Air Contaminants (TACs)	Not applicable: Project would not include uses that emit TACs.
J. Archeological Resources	
J-1: Properties with Previous Studies	Not applicable: No previous archeological research design and treatment plan is on file for the project site.
J-2: Properties with no Previous Studies	Applicable: Project located in Mission Dolores Archeological District. Requirement satisfied by sponsor.
J-3: Mission Dolores Archeological District	Applicable: Project involves 8 to 12 feet of soil excavation/disturbance where resources may be present in Mission Dolores Archeological District. Project Mitigation Measure M-CP-1.
K. Historical Resources	
K-1: Interim Procedures for Permit Review in the Eastern Neighborhoods Plan Area	Not applicable: Plan-level mitigation completed by Planning Department.
K-2: Amendments to Article 10 of the Planning Code Pertaining to Vertical Additions in the South End Historic District (East SoMa)	Not applicable: Plan-level mitigation completed by Planning Commission.

Mitigation Measure	Applicability
K-3: Amendments to Article 10 of the Planning Code Pertaining to Alterations and Infill Development in the Dogpatch Historic District (Central Waterfront)	Not applicable: Plan-level mitigation completed by Planning Commission.
L. Hazardous Materials	
L-1: Hazardous Building Materials	Applicable: Demolition of existing building. Project Mitigation Measure M-HZ-1.

Please see the attached Exhibit C: Mitigation Monitoring and Reporting Program (MMRP),⁶ for the complete text of the applicable mitigation measures. With implementation of these mitigation measures, the proposed project would not result in significant impacts beyond those analyzed in the Eastern Neighborhoods PEIR.

PUBLIC NOTICE AND COMMENT

A “Notification of Project Receiving Environmental Review” was mailed on April 22, 2014 to occupants of properties adjacent to the project site and to owners of properties within 300 feet of the project site. Overall, concerns and issues raised by the public in response to the notice were taken into consideration and incorporated in the environmental review as appropriate for CEQA analysis. No public comments were received regarding physical environmental effects.

CONCLUSION

As summarized above and further discussed in the CPE Checklist:⁷

1. The proposed project is consistent with the development density established for the project site in the Eastern Neighborhoods Rezoning and Area Plans;
2. The proposed project would not result in effects on the environment that are peculiar to the project or the project site that were not identified as significant effects in the Eastern Neighborhoods PEIR;
3. The proposed project would not result in potentially significant off-site or cumulative impacts that were not identified in the Eastern Neighborhoods PEIR;
4. The proposed project would not result in significant effects, which, as a result of substantial new information that was not known at the time the Eastern Neighborhoods PEIR was certified, would be more severe than were already analyzed and disclosed in the PEIR; and
5. The project sponsor will undertake feasible mitigation measures specified in the Eastern Neighborhoods PEIR to mitigate project-related significant impacts.

Therefore, the proposed project is exempt from further environmental review pursuant to Public Resources Code Section 21083.3 and CEQA Guidelines Section 15183.

⁶ The mitigation measures would be adopted as Conditions of Approval, and the MMRP would be attached to Planning Commission approval documents as Exhibit C.

⁷ The CPE Checklist is available for review at the San Francisco Planning Department, 1650 Mission Street, Suite 400, as part of Case File No. 2009.1011E.

ATTACHMENT 1: MITIGATION MONITORING AND REPORTING PROGRAM

<u>Adopted Mitigation/Improvement Measures</u>	MONITORING AND REPORTING PROGRAM			
	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
<p>MITIGATION MEASURES</p> <p><u>Project Mitigation Measure M-CP-1: Archeological Testing (Mitigation Measure J-3 of the Eastern Neighborhoods PEIR)</u></p> <p>Based on a reasonable presumption that archeological resources may be present on the project site, the following measures shall be undertaken to avoid any potentially significant adverse effect from the proposed project on buried or submerged historical resources. The project sponsor shall retain the services of an archeological consultant from the rotational Department Qualified Archeological Consultants List (QACL) maintained by the Planning Department archeologist. The project sponsor shall contact the Planning Department archeologist to obtain the names and contact information for the next three archeological consultants on the QACL. The archeological consultant shall undertake an archeological testing program as specified herein. In addition, the consultant shall be available to conduct an archeological monitoring and/or data recovery program if required pursuant to this measure. The archeological consultant’s work shall be conducted in accordance with this measure at the direction of the ERO. All plans and reports prepared by the consultant as specified herein shall be submitted first and directly to the ERO for review and</p>	Project sponsor.	Prior to issuance of any permit for soil-disturbing activities and during construction.	Project Sponsor; ERO; archeologist.	Considered complete upon ERO’s approval of FARR.

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

comment, and shall be considered draft reports subject to revision until final approval by the ERO. Archeological monitoring and/or data recovery programs required by this measure could suspend construction of the project for up to a maximum of 4 weeks. At the direction of the ERO, the suspension of construction can be extended beyond 4 weeks only if such a suspension is the only feasible means to reduce to a less-than-significant level potential effects on a significant archeological resource as defined in CEQA Guidelines Section 15064.5(a)(c).

Consultation with Descendant Communities. On discovery of an archeological site¹ associated with descendant Native Americans, the Overseas Chinese, or other descendant group, an appropriate representative² of the descendant group and the ERO shall be contacted. The representative of the descendant group shall be given the opportunity to monitor archeological field investigations of the site, and to consult with ERO regarding appropriate archeological treatment of the site; of recovered data from the site; and if applicable, any interpretative treatment of the associated archeological site. A copy of the Final Archeological Resources Report shall be provided to the representative of the descendant

¹ The term “archeological site” is intended to minimally include any archeological deposit, feature, burial, or evidence of burial.

² An “appropriate representative” of the descendant group is defined, in the case of Native Americans, as any individual listed in the current Native American Contact List for the City and County of San Francisco maintained by the California Native American Heritage Commission; and in the case of the Overseas Chinese, the Chinese Historical Society of America. An appropriate representative of other descendant groups should be determined in consultation with the Planning Department archeologist.

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

group.

Archeological Testing Program. The archeological consultant shall prepare and submit to the ERO for review and approval an archeological testing plan (ATP). The archeological testing program shall be conducted in accordance with the approved ATP. The ATP shall identify the property types of the expected archeological resource(s) that potentially could be adversely affected by the proposed project; the testing method to be used; and the locations recommended for testing. The purpose of the archeological testing program will be to determine to the extent possible the presence or absence of archeological resources and to identify and to evaluate whether any archeological resource encountered on the site constitutes an historical resource under CEQA.

At the completion of the archeological testing program, the archeological consultant shall submit a written report of the findings to the ERO. If, based on the archeological testing program, the archeological consultant finds that significant archeological resources may be present, the ERO, in consultation with the archeological consultant, shall determine if additional measures are warranted. Additional measures that may be undertaken include additional archeological testing, archeological monitoring, and/or an archeological data recovery program. No archeological data recovery shall be undertaken without the prior approval of the ERO or the Planning Department archeologist. If the ERO determines that a significant

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

archeological resource is present and that the resource could be adversely affected by the proposed project, at the discretion of the project sponsor, either:

- A) The proposed project shall be re-designed so as to avoid any adverse effect on the significant archeological resource; or
- B) A data recovery program shall be implemented, unless the ERO determines that the archeological resource is of greater interpretive than research significance, and that interpretive use of the resource is feasible.

Archeological Monitoring Program. If the ERO, in consultation with the archeological consultant, determines that an archeological monitoring program shall be implemented, the archeological monitoring program shall minimally include the following provisions:

- The archeological consultant, project sponsor, and ERO shall meet and consult on the scope of the AMP reasonably prior to the commencement of any project-related soils-disturbing activities. The ERO, in consultation with the archeological consultant, shall determine which project activities shall be archeologically monitored. In most cases, any soils-disturbing activities, such as demolition, foundation removal, excavation, grading, utilities installation, foundation work, driving of piles (foundation, shoring, etc.), or site

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
<p>remediation shall require archeological monitoring because of the risk these activities pose to potential archeological resources and to their depositional context.</p> <ul style="list-style-type: none"> ▪ The archeological consultant shall advise all project contractors to be on the alert for evidence of the presence of the expected resource(s), of how to identify the evidence of the expected resource(s), and of the appropriate protocol in the event of apparent discovery of an archeological resource. ▪ The archeological monitor(s) shall be present on the project site according to a schedule agreed upon by the archeological consultant and the ERO until the ERO has, in consultation with the project archeological consultant, determined that project construction activities could have no effects on significant archeological deposits. ▪ The archeological monitor shall record and be authorized to collect soil samples and artifactual/ecofactual material as warranted for analysis. ▪ If an intact archeological deposit is encountered, all soils-disturbing activities in the vicinity of the deposit shall cease. The archeological monitor shall be empowered to temporarily redirect demolition/excavation/pile-driving/construction activities and equipment until the deposit is 				

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

evaluated. If, in the case of pile-driving activity (foundation, shoring, etc.), the archeological monitor has cause to believe that the pile-driving activity may affect an archeological resource, the pile-driving activity shall be terminated until an appropriate evaluation of the resource has been made, in consultation with the ERO. The archeological consultant shall immediately notify the ERO of the encountered archeological deposit. The archeological consultant shall make a reasonable effort to assess the identity, integrity, and significance of the encountered archeological deposit, and present the findings of this assessment to the ERO.

Whether or not significant archeological resources are encountered, the archeological consultant shall submit a written report of the findings of the monitoring program to the ERO.

Archeological Data Recovery Program. The archeological data recovery program shall be conducted in accordance with an archeological data recovery plan (ADRP). The archeological consultant, project sponsor, and ERO shall meet and consult on the scope of the ADRP prior to preparation of a draft ADRP. The archeological consultant shall submit a draft ADRP to the ERO. The ADRP shall identify how the proposed data recovery program will preserve the significant information the archeological resource is expected to contain. The ADRP

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

will identify what scientific/historical research questions are applicable to the expected resource, what data classes the resource is expected to possess, and how the expected data classes would address the applicable research questions. Data recovery, in general, should be limited to the portions of the historical property that could be adversely affected by the proposed project. Destructive data recovery methods shall not be applied to portions of the archeological resources if nondestructive methods are practical.

The scope of the ADRP shall include the following elements:

- **Field Methods and Procedures.** Descriptions of proposed field strategies, procedures, and operations.
- **Cataloguing and Laboratory Analysis.** Description of selected cataloguing system and artifact analysis procedures.
- **Discard and De-accession Policy.** Description of and rationale for field and post-field discard and de-accession policies.
- **Interpretive Program.** Consideration of an on-site/off-site public interpretive program during the course of the archeological data recovery program.
- **Security Measures.** Recommended security

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

measures to protect the archeological resource from vandalism, looting, and non-intentionally damaging activities.

- **Final Report.** Description of proposed report format and distribution of results.
- **Curation.** Description of the procedures and recommendations for the curation of any recovered data having potential research value, identification of appropriate curation facilities, and a summary of the accession policies of the curation facilities.

Human Remains and Associated or Unassociated Funerary Objects. The treatment of human remains and of associated or unassociated funerary objects discovered during any soils-disturbing activity shall comply with applicable state and federal laws. This shall include immediate notification of the Coroner of the City and County of San Francisco; and in the event of the Coroner’s determination that the human remains are Native American remains, notification of the California State Native American Heritage Commission, who shall appoint a Most Likely Descendant (MLD) (Pub. Res. Code Sec. 5097.98). The archeological consultant, project sponsor, and MLD shall make all reasonable efforts to develop an agreement for the treatment of, with appropriate dignity, human remains and associated or unassociated funerary objects (CEQA Guidelines, Section 15064.5[d]). The agreement should take into

MONITORING AND REPORTING PROGRAM

Adopted Mitigation/Improvement Measures	Responsibility for Implementation	Mitigation/Improvement Schedule	Monitoring/Reporting Responsibility	Monitoring Schedule
--	--	--	--	----------------------------

consideration the appropriate excavation, removal, recordation, analysis, custodianship, curation, and final disposition of the human remains and associated or unassociated funerary objects.

Final Archeological Resources Report. The archeological consultant shall submit a Draft Final Archeological Resources Report (FARR) to the ERO that evaluates the historical significance of any discovered archeological resource and describes the archeological and historical research methods employed in the archeological testing/monitoring/data recovery program(s) undertaken. Information that may put at risk any archeological resource shall be provided in a separate removable insert in the final report.

Once approved by the ERO, copies of the FARR shall be distributed as follows: California Archeological Site Survey Northwest Information Center (NWIC) shall receive one copy, and the ERO shall receive a copy of the transmittal of the FARR to the NWIC. The Environmental Planning division of the Planning Department shall receive one bound, one unbound, and one unlocked, searchable PDF copy on CD of the FARR, along with copies of any formal site recordation forms (CA DPR 523 series) and/or documentation for nomination to the National Register of Historic Places/CRHR. In instances of high public interest in or the high interpretive value of the resource, the ERO may require a different final report content, format, and distribution than that presented

MONITORING AND REPORTING PROGRAM

above.

Project Mitigation Measure M-NO-1: Construction Noise from Pile Driving (Mitigation Measure F-1 of the Eastern Neighborhoods PEIR)

Project sponsor, contractor(s).

During construction period.

Project sponsor to provide monthly noise reports during construction.

Considered complete upon final monthly report.

The project sponsor shall ensure that piles be pre-drilled wherever feasible to reduce construction-related noise and vibration. No impact pile drivers shall be used unless absolutely necessary. Contractors shall use pile-driving equipment with state-of-the-art noise shielding and muffling devices. To reduce noise and vibration impacts, sonic or vibratory sheetpile drivers, rather than impact drivers, shall be used wherever sheetpiles are needed. The project sponsor shall also require that contractors schedule pile-driving activity for times of the day that would minimize disturbance to neighbors.

Project Mitigation Measure M-NO-2: Construction Noise (Mitigation Measure F-2 of the Eastern Neighborhoods PEIR)

Project sponsor, contractor(s).

During construction period.

Project sponsor to provide monthly noise reports during construction.

Considered complete upon final monthly report.

The project sponsor shall develop a set of site-specific noise attenuation measures under the supervision of a qualified acoustical consultant. Prior to commencing construction, a plan for such measures shall be submitted to the Department of Building Inspection (DBI) to ensure that maximum feasible noise attenuation will be achieved. These attenuation measures shall include as many of the

MONITORING AND REPORTING PROGRAM

following control strategies as feasible:

- Erect temporary plywood noise barriers around a construction site, particularly where a site adjoins noise-sensitive uses;
- Utilize noise control blankets on a building structure as the building is erected to reduce noise emission from the site;
- Evaluate the feasibility of noise control at the receivers by temporarily improving the noise reduction capability of adjacent buildings housing sensitive uses;
- Monitor the effectiveness of noise attenuation measures by taking noise measurements; and
- Post signs on-site pertaining to permitted construction days and hours and complaint procedures and who to notify in the event of a problem, with telephone numbers listed.

Project Mitigation Measure M-NO-3: Open Space in Noisy Environments (Mitigation Measure F-6 of the Eastern Neighborhoods PEIR)

To minimize effects on development in noisy areas, for new development including noise-sensitive uses, the Planning Department shall, through its building permit review process, in conjunction with noise analysis required pursuant to Mitigation Measure F-4, require that

Project sponsor, contractor(s).	Prior to entitlement/building permit approval.	Planning Department.	Considered completed upon approval of project plans by the Planning Department.

<p>open space required under the Planning Code for such uses be protected, to the maximum feasible extent, from existing ambient noise levels that could prove annoying or disruptive to users of the open space. Implementation of this measure could involve, among other things, site design that uses the building itself to shield on-site open space from the greatest noise sources, construction of noise barriers between noise sources and open space, and appropriate use of both common and private open space in multi-family dwellings, and implementation would also be undertaken consistent with other principles of urban design.</p>				
<p>Project Mitigation Measure M-AQ-1: Construction Air Quality (Mitigation Measure G-1 of the Eastern Neighborhoods PEIR)</p> <p>A. <i>Engine Requirements.</i></p> <p>1. All off-road equipment greater than 25 hp and operating for more than 20 total hours over the entire duration of construction activities shall have engines that meet or exceed either U.S. Environmental Protection Agency (USEPA) or California Air Resources Board (ARB) Tier 2 off-road emission standards, and have been retrofitted with an ARB Level 3 Verified Diesel Emissions Control Strategy. Equipment with engines meeting Tier 4 Interim or Tier 4 Final off-road emission standards automatically meet this</p>	Project sponsor/ contractor(s).	Prior to construction activities requiring the use of off-road equipment.	Submit certification statement.	Project sponsor / contractor(s) and the ERO. Considered complete on submittal of certification statement.

<p>requirement.</p> <p>2. Where access to alternative sources of power are available, portable diesel engines shall be prohibited.</p> <p>3. Diesel engines, whether for off-road or on-road equipment, shall not be left idling for more than two minutes, at any location, except as provided in exceptions to the applicable state regulations regarding idling for off-road and on-road equipment (e.g., traffic conditions, safe operating conditions). The Contractor shall post legible and visible signs in English, Spanish, and Chinese, in designated queuing areas and at the construction site to remind operators of the two minute idling limit.</p> <p>4. The Contractor shall instruct construction workers and equipment operators on the maintenance and tuning of construction equipment, and require that such workers and operators properly maintain and tune equipment in accordance with manufacturer specifications.</p>				
<p>B. <i>Waivers.</i></p>				
<p>1. The Planning Department’s Environmental Review Officer or designee (ERO) may waive the alternative source of power requirement of Subsection (A)(2) if an alternative source of power is limited or infeasible at the project site. If the</p>

ERO grants the waiver, the Contractor must submit documentation that the equipment used for on-site power generation meets the requirements of Subsection (A)(1).

- The ERO may waive the equipment requirements of Subsection (A)(1) if: a particular piece of off-road equipment with an ARB Level 3 VDECS is technically not feasible; the equipment would not produce desired emissions reduction due to expected operating modes; installation of the equipment would create a safety hazard or impaired visibility for the operator; or, there is a compelling emergency need to use off-road equipment that is not retrofitted with an ARB Level 3 VDECS. If the ERO grants the waiver, the Contractor must use the next cleanest piece of off-road equipment, according to Table below.

Table – Off-Road Equipment Compliance Step-down Schedule

Compliance Alternative	Engine Emission Standard	Emissions Control
1	Tier 2	ARB Level 2 VDECS
2	Tier 2	ARB Level 1 VDECS
3	Tier 2	Alternative Fuel*

How to use the table: If the ERO determines that the equipment requirements cannot be met, then the project sponsor would need to meet Compliance Alternative 1. If the ERO determines that the Contractor cannot supply off-road equipment meeting Compliance Alternative 1, then the Contractor must meet Compliance Alternative 2. If the ERO determines that the Contractor cannot supply off-road equipment meeting Compliance Alternative 2, then the Contractor must meet Compliance Alternative 3.

** Alternative fuels are not a VDECS.

MONITORING AND REPORTING PROGRAM

<p>C. <i>Construction Emissions Minimization Plan.</i> Before starting on-site construction activities, the Contractor shall submit a Construction Emissions Minimization Plan (Plan) to the ERO for review and approval. The Plan shall state, in reasonable detail, how the Contractor will meet the requirements of Section A.</p> <ol style="list-style-type: none"> 1. The Plan shall include estimates of the construction timeline by phase, with a description of each piece of off-road equipment required for every construction phase. The description may include, but is not limited to: equipment type, equipment manufacturer, equipment identification number, engine model year, engine certification (Tier rating), horsepower, engine serial number, and expected fuel usage and hours of operation. For VDECS installed, the description may include: technology type, serial number, make, model, manufacturer, ARB verification number level, and installation date and hour meter reading on installation date. For off-road equipment using alternative fuels, the description shall also specify the type of alternative fuel being used. 2. The ERO shall ensure that all applicable requirements of the Plan have been incorporated into the contract specifications. The Plan shall include a certification statement that the Contractor agrees to comply fully with the Plan.

<p>3. The Contractor shall make the Plan available to the public for review on-site during working hours. The Contractor shall post at the construction site a legible and visible sign summarizing the Plan. The sign shall also state that the public may ask to inspect the Plan for the project at any time during working hours and shall explain how to request to inspect the Plan. The Contractor shall post at least one copy of the sign in a visible location on each side of the construction site facing a public right-of-way.</p> <p>D. <i>Monitoring.</i> After start of construction activities, the Contractor shall submit quarterly reports to the ERO documenting compliance with the Plan. After completion of construction activities and prior to receiving a final certificate of occupancy, the project sponsor shall submit to the ERO a final report summarizing construction activities, including the start and end dates and duration of each construction phase, and the specific information required in the Plan.</p>	Project sponsor	Prior to any demolition or construction activities.
